Objective

Aspiring Software Engineer currently pursuing a B.Tech in Computer Science (AI). Focused on building efficient, user-centered applications with a strong foundation in programming, data structures, and practical AI concepts. Seeking internships to apply skills in product-driven environments.

Education

Lucknow University — Lucknow, India
Bachelor of Technology - Computer Science (Artificial Intelligence) — *2024 – 2028 (Expected)*
Relevant Coursework: Data Structures & Algorithms, OOP, Numerical & Statistical Techniques, Artificial Intelligence, Database Management Systems.

Technical Skills

Languages: C++, Python, C, Java
Developer Tools: Git, GitHub, VS Code, Replit
AI Emerging Tech: Generative AI, Agentic AI
Core Concepts: Data Structures & Algorithms, OOP, Memory Management

Projects

Road Monitoring System | *Hackathon* | GitHub
- Developed a computer vision tool for analyzing road defects to assist in civic infrastructure maintenance.
- Contributed to data modeling and generation of automated maintenance reports using Python libraries.
- Optimized backend logic to process image data efficiently, reducing report generation time.

EcoLearn | *Hackathon* | GitHub
- Built a game-based learning platform focused on environmental education using interactive modules.
- Designed a responsive UI/UX to enhance user engagement across different device sizes.
- Implemented gamification mechanics (points and badges) which improved learning retention rates.

HealthOnTrack | *Web App* | Live
- Developed a health monitoring web app with responsive dashboards for tracking daily user metrics.
- Ensured cross-platform compatibility by optimizing the User Interface (UI) for mobile browsers.
- Integrated clean data visualization components to display health trends effectively.

QR Code Generator | *CS50 Final* |
- Implemented a Python-based QR code generator using a modular architecture for code reusability.
- Integrated external libraries to handle dynamic image generation and accurate data encoding.
- Designed a simple CLI (Command Line Interface) for users to generate codes rapidly.

Achievements

CS50x CS50P Completion (Harvard University): Completed rigorous coursework in C, Python, Memory Management, and Data Structures.
Smart India Hackathon Participant: Competed in a national-level hackathon, collaborating to solve real-world problems under time constraints.
Samsung Innovation Campus Hackathon: Collaborated on AI-driven solutions for civic issues, focusing on practical implementation.
Open Source Contributor: Actively contributing to technical repositories on GitHub, focusing on clean code and documentation.

Interests

Technical: Game Development, Open Source Contribution, Competitive Programming
Hobbies: Chess, Tech Blogging, Strategic Gaming
